- HTML/ CSS SASS, Bootstrap
- <u>JaveScript</u> jQuery, Underscore.js
- Backbone.js
- React.js
- <u>Node.js</u> Heroku deployment, Node Package Manager
- Parse (open source)
- Git

Education

The Iron Yard | Front End Engineering | April 2016

The Iron Yard is a 12-week immersive code school where I gained the skills to become a Front End Engineer. The first 9 weeks I attended lectures where I learned skills such as, HTML, CSS, JavaScript, Backbone.js, and React.js. The last 3 weeks were spent working on my final project, Wander No More, a web application that helps you decide what to do, when you can't.

Projects

Wander No More | The Iron Yard

My final project at The Iron Yard, Wander No More is a web app that helps you decide what to do, when you can't.

Surf and Paddle | The Iron Yard

<u>Surf and Paddle</u> is a pixel perfect recreation of a pdf image using purely html and css.

Etsy Recreation | The Iron Yard

This is a Recreation of Etsy with dynamic content from the Etsy API.
