- *Manage e-commerce website using Magento e-commerce platform*

The Iron Yard - Teachers Assistant | *July 2016 - August 2016*

Assisted in teaching Front-End Engineering students HTML, CSS, JavaScript and popular JavaScript libraries such as React and jQuery.

Education

The Iron Yard | *Front-End Engineering* | *April 2016*

The Iron Yard is a 12-week immersive code school where I gained the skills to become a Front-End Engineer. The first 9 weeks I attended lectures where I learned skills such as, HTML, CSS, JavaScript, Backbone.js, and React.js. The last 3 weeks were spent working on my final project, Wander No More, a web application that helps you decide what to do.
